AYUSH RAJ

Full Stack Developer | +91 6204888284
ayushr841417@gmail.com | LinkedIn | GitHub

Summary

Results-driven MCA student with a strong foundation in MERN Stack, Java, DSA, and modern web technologies. Skilled in building responsive and scalable applications, solving problems efficiently, and continuously learning emerging technologies. Interested in collaborating on impactful software development projects in dynamic and growth-oriented environments.

Education

Master of Computer Applications (MCA) 2025 – 2027
Pondicherry University

Skills

Programming Languages: Java, JavaScript, Python, C, C++

Web Development: HTML, CSS, React.js, Node.js, Express.js

Databases: MongoDB, MySQL

Tools & Technologies: Git, GitHub, REST APIs, VS Code

Core Subjects: DSA, DBMS, Operating Systems, Computer Networks

Projects

StudySync AI — MERN Stack, Socket.io, OpenAI API, Tailwind CSS

- Architected and deployed an AI-powered collaborative EdTech SaaS platform featuring real-time study rooms, intelligent note summarization, automated quiz generation, and scalable full-stack MERN architecture.
- Engineered secure JWT authentication, role-based access control, RESTful APIs, Socket.io real-time communication, and optimized MongoDB schema design with responsive cross-platform UI/UX performance optimization.

DevConnect AI — MERN Stack, GitHub API, Redux Toolkit, Tailwind CSS

- Developed a scalable developer networking and career intelligence platform integrating GitHub analytics, coding profile insights, AI-powered resume analysis, and real-time collaboration capabilities.
- Implemented modular React architecture, secure authentication workflows, high-performance REST APIs, third-party API integrations, and responsive dashboard systems following modern software engineering practices.

InterviewX — MERN Stack, OpenAI API, Monaco Editor, Socket.io

- Built an AI-driven mock interview and coding assessment platform enabling real-time technical interviews, automated feedback analytics, and intelligent interview performance evaluation.
- Designed scalable backend microservice-inspired architecture with secure authentication, live communication systems, interactive coding environments, and optimized full-stack application performance for seamless user experience.

Certifications

- NPTEL Certification — Cloud Computing
- NPTEL Certification — Joy of Computing Using Python
- NPTEL Certification — Internet of Things(IoT)
- Participant — Hackathons and Technical Events

Activities

- Actively solving DSA problems and improving problem-solving skills.
- Exploring AI tools, modern web technologies, and full stack development.
